

InsightIQ

AI research for your
next sales conversation

Cited claims. Conditional fit. Questions worth asking.

Alibaba Bano Qabil AI Hackathon 2026

The idea behind InsightIQ

For people who sell

B2B sales teams
Agencies pitching clients
Founders finding customers

Before the conversation

What is sourced?
What is inferred?
What should I ask?

Each angle connects a public claim to your offer.

A hypothesis explains the possible fit. A question helps you test it.

Meeting prep or outreach

You choose the goal.

Add a prospect and explain what you sell. InsightIQ keeps both in context.

NEW CONVERSATION BRIEF

Research once. Walk in prepared.

Tell us who you are meeting or contacting. We will find the strongest public signals and turn them into a usable plan.

 What do you need?
Choose the output you will use next.

☐ **Prepare for a meeting**
Why now, talk track, questions, objections

☒ **Write personalized outreach**
Relevant angle, opener, email draft, next step

 Add the prospect
Name and company are enough to start. Add a domain or LinkedIn URL for sharper matching.

Prospect name:

Company:

Research starts immediately. Key signals link back to their sources.

[Build outreach draft →](#)

Meeting: talking points and questions

Outreach: an opener and draft to adapt

How a Deal Brief takes shape

Sources stay attached so the seller can review the reasoning.

Your research, in one workspace

Research progress

Team workspace

Keep prospect research together.

Conversation angles you can test

Vercel example: product detail

Source claim

Guillermo Rauch created Next.js and Vercel with a focus on developer experience (DX) to make the Web faster.

Why it could matter

If the stated focus on developer experience to make the Web faster means Vercel actively tracks where new users struggle, then onboarding funnel analytics combining usage metrics and session feedback might help prioritize documentation and product fixes more effectively.

Hypothesis to validate

Ask in the conversation

How do you currently identify which parts of the initial developer setup cause the most friction?

The evidence stays within reach

 **Sources & confidence**
5 claims used in this brief

Hide evidence

These are the claims cited in this brief. AI confidence describes the model's assessment; it does not independently verify the source.

LAUNCH AI 84% confidence
Guillermo Rauch created Next.js and Vercel with a focus on developer experience (DX) to make the Web faster.
[About - Guillermo Rauch](#)

HIRING AI 83% confidence
Vercel's customer success leaders are highly experienced engineers who can identify, address, and solve customer problems.
[From Open-Source to Enterprise: How Vercel Built a Product-Led Motion on top of NextJS - Decibel](#)

HIRING AI 83% confidence
Vercel built out a Sales team of technical Account Executives and Sales Engineers to work alongside developers.
[From Open-Source to Enterprise: How Vercel Built a Product-Led Motion on top of NextJS - Decibel](#)

FUNDING AI 82% confidence
Vercel reached a \$3.25 billion valuation following a \$250 million funding round in May.

Trace each signal

Key signals must match a stored claim and its source URL.

Check the gaps

Review freshness and contradictions before using the brief.

AI-generated demo research. Source links make claims traceable, not guaranteed.

Architecture

A responsive app, with research running in the background

PostgreSQL stores workspace data and queues research jobs.

An outreach draft for your review

A source-based opener, a conditional fit, and a question that invites a reply.

Hi Guillermo,

I noticed Vercel's stated vision includes providing analytics as part of an end-to-end platform. With 3 product tiers and technical Account Executives working alongside developers, I'm curious how your team identifies where developers get stuck during onboarding.

We help developer platforms combine usage metrics and session feedback to prioritize documentation and product fixes. If improving onboarding visibility is a current focus, would it make sense to connect?

Best,
E2E Tester

Personalize the message and verify its claims before sending.
