

InsightIQ

AI research for your
next sales conversation

Prospect context. Your offer. A brief with sources.

Alibaba Bano Qabil AI Hackathon 2026

The idea behind InsightIQ

For people who sell

B2B sales teams
Agencies pitching clients
Founders finding customers

Before the conversation

What changed at this company?
Why does our offer matter now?
Can I verify the claim?

Your prospect's context makes your offer more relevant.

InsightIQ connects public signals to your offer and suggests what to discuss.

The research workflow

The same evidence supports meeting preparation or personalized outreach.

InsightIQ architecture

The interactive app and research worker share one source of stored evidence.

The dashboard stays responsive while the worker researches and saves the brief.

Your research, in one workspace

The screenshot shows the 'SALES WORKSPACE' interface for 'InsightIQ Demo'. On the left is a sidebar with icons for a dashboard, home, search, and a settings icon labeled 'SS'. The main header includes a 'Research prospect' button and a notification bell. The main content area greets the user with 'WELCOME, STOE' and the message 'Your next conversation starts here.' Below this is a sub-header: 'Turn public account signals into a focused meeting plan or a personalized outreach draft.' A large dark blue card titled 'Tim Cook at Apple' is marked 'READY TO USE' and 'High Urgency'. It contains the text 'Meeting brief built from 114 cited signals and aligned to Sales onboarding platform.' and a button 'Open conversation brief →'. To the right of this card is a summary panel with three items: '1 Prospects researched', '1 Briefs ready', and '0 In progress'. Below the main card is a 'Recent prospects' section with the instruction 'Open a ready brief directly, or check work still in progress.' and a 'View all' link. It displays a card for 'Tim Cook · Apple' with a 'Ready' status, 'High Urgency', and the date 'Sep 7'. At the bottom left is a red '[→]' icon.

Meeting prep

Talking points, questions, objections, and next steps.

Outreach

Personalized drafts shaped around your offer.

A brief shaped around what you sell

The screenshot displays the 'InsightIQ Demo' interface within a 'SALES WORKSPACE'. The main heading is 'Tim Cook at Apple', categorized as a 'MEETING BRIEF · READY'. A sub-header reads: 'Use the recommendations first. Open sources only when you need to verify or share the evidence.' Below this, there are several tags: 'Offer Sales onboarding platform', 'Cited signals 114', 'Updated Sep 7, 2026', and a 'Copy for CRM' button. A dark blue box titled 'WHY THIS CONVERSATION MATTERS' contains the following text: 'Tim Cook is the current CEO of Apple Inc. This is the strongest verified reason to frame your meeting around Sales onboarding platform. Test whether help distributed sales teams learn new products and deliver consistent customer conversations with guided onboarding and training analytics. demo offer for this research example is a current priority before pitching.' Below this text are five 'Leadership' tags, each with a number in brackets: '[1] Leadership', '[2] Leadership', '[3] Leadership', '[4] Leadership', and '[5] Leadership'. At the bottom, a section titled 'OPEN WITH THIS' provides a suggested opener: 'Tim, I saw that tim cook is the current ceo of apple inc. How is that shaping priorities at Apple right now?'. A 'Copy opener' button is located to the right of this text. The interface also features a sidebar with navigation icons and a top bar with a search function and a notification bell.

Prepare with context

Use the opener and talking points as a starting point. Follow the source links.

AI-generated demo.
Human review required.

Evidence you can inspect

The screenshot displays the 'InsightIQ Demo' interface within a 'SALES WORKSPACE'. The top navigation bar includes a search bar with 'Research prospect' and a notification bell. The main section is titled 'EVIDENCE LIBRARY' with the heading 'Trace every signal.' and a subtext: 'Public sources stay separate from normalized claims, so useful context never becomes a "fact" without provenance.' Below this, four summary cards show: '18 Collected sources', '114 Verified claims', '17 Cited sources', and '1 Awaiting review'. A 'Research queue' search bar is also present. The 'Public source layer' section, described as 'Discovery output awaiting or supporting evidence extraction.', contains six source cards. Each card shows a source name, a headline, a snippet of text, the number of claims, and the date 'Sep 7'. The sources are LATIMES.COM, NEWSWEEK.COM, SDXCENTRAL.COM, APPLE.COM (two entries), and BRITANNICA.COM.

Trace the claim

Each key signal must match its stored evidence record and source URL.

Review the gaps

Citations make claims traceable. They do not guarantee accuracy.

What we built

A complete research workflow

Shared workspaces and live research
Evidence library and saved briefs
Refresh comparisons and exports

The intended benefit

Less scattered preparation.
A clearer reason to reach out.
Sources to check before use.

Next: broader sources and measured output quality
